01/2006 – 06/2020

Nazhin Computer

Tehran, Iran

- Provided comprehensive service both in-shop and at customer locations.

EDUCATION

Diploma/Full-Stack Web Development

Lighthouse Labs 

01/2023 – 04/2023
British Columbia,
Canada

- Completed a 16-week full-time web development bootcamp program at Lighthouse, gaining over 1300 hours of hands-on experience with various tech stacks.
- Honed skills as a developer and became proficient in writing full-stack applications using React, PSQl databases, NodeJs servers, and other libraries.
- Successfully completed over 6 practical REST-API apps like:
 - ++ Movie-Island  : A React application that allows users to search and look up information about movies and watch their trailers. The application includes pages, search functionality, Also the ability for users to upload their videos and movies.
 - ++ Interview-Scheduler  : A 7-day deadline React application that allows users to book/edit/cancel interviews. I combined a concise API with an Express/WebSocket server to build a real-time experience and managed complex states using reducers. Also while implementing testing in Storybook, Jest and Cypress.
 - ++ Smart To Do  : a single-page application. users can easily input the name of their daily todo's. Then, by using GoogleAPI, the app will find the appropriate category for that and save it. Users can edit or delete items.

Associate of Science/ Applied Web Development

British Columbia Institute of Technology (BCIT) 

01/2022
British Columbia,
Canada

- Strengthened proficiency in JavaScript and TypeScript through continuous learning and skill enhancement initiatives.
- Successfully executed projects utilizing React.js and Next.js
